

PROPOSALS

Proposal A

A proposal to the Illinois District board asking that the current method of determining our district chorus champion, including our district representative to the International chorus contest, be revised as follows.

That the fall 2012 chorus contest be an open contest with all district chapter choruses eligible for entry. The chorus placing first in this contest shall become the district chorus champion for that year and the district chorus representative for the following international convention.

All choruses in the fall contest receiving an average score of 70 and higher shall receive a bye and will not be required to enter the following spring chorus competition.

All choruses with average scores below 70 and all choruses having not entered the fall contest are eligible to enter the following spring international preliminary chorus contest.

The spring preliminary chorus contest shall determine those choruses that will become eligible to compete for the fall district championship and to qualify for the international contest. Those choruses with average scores of 41 and higher in the spring contest automatically become eligible to enter the fall chorus contest. These choruses would join those choruses receiving a bye from the previous fall chorus contest
